**Objectives of Sustainable Population Australia (SPA)**

1. To contribute to public awareness of the limits of Australian population growth from ecological, social and economic viewpoints.
2. To promote awareness that the survival of an ecologically sustainable population depends in the long-term on its renewable resource base.
3. To promote policies that will lead to the stabilisation, and then to reduction, of Australia's population by encouraging low fertility and low migration.
4. To promote urban and rural life-styles and practices that are in harmony with the realities of the Australian environment, its resource base and its biodiversity.
5. To advocate low immigration rates while rejecting any selection of immigrants based on race.
6. To promote policies that will lead to stabilisation, and then to reduction, of global population.
